## **FOREWORD**

SST-88, the Second Australian International Conference on Speech Science and Technology, was held at Macquarie University in Sydney from 29 November to 1 December 1988. SST-88 was the second in the biennial sequence of conferences on speech science and technology which began with SST-86 in Canberra.

The conference series aims at bringing together and facilitating the communication between researchers and students from the entire spectrum of the multidisciplinary field of speech science and technology. Its second aspect is to provide a forum for the interaction and discussion between speech researchers from Australia and other countries.

While a majority of the contributions to SST-88 originated from Australia, the interest and participation in the conference by researchers from other countries increased significantly since SST-86. Of the 76 papers which were presented at SST-88, 22 were contributed by researchers from 10 countries in Asia, Europe and North America. This increasing international outlook of the conference prompted the organisers to include the word *international* in the conference title.

As the financial responsibility for the conference grew with the increasing number of conference papers, the organisation of the conference series was placed in the hands of the formally incorporated Australian Speech Science and Technology Association (ASSTA) which held its first general meeting in conjunction with SST-88.

ASSTA was founded as a professional organisation for those who are active in speech science and technology as researchers and students, and it offers associate membership to all those who have an interest in this field. In addition to the organisation of the biennial SST conferences, ASSTA provides a general forum for the exchange of information between speech researchers and the general public. ASSTA publishes a regular newsletter and the possibility of launching other speech science and technology publications was discussed at the first general meeting during SST-88.

Owing to the increased number of contributions to the conference, SST-88 had to be changed from a 2-day format to a 3-day format comprising 18 parallel sessions. Each conference session is presented as one section of the Proceedings.

I wish to thank all authors for their efforts to adhere to the extensive set of instructions and to submit their copy in time.

Canberra November 1988

Michael Wagner

# **SPONSORS**

### **Major Sponsors**

Department of Industry Technology and Commerce Overseas Telecommunications Commission Telecom Australia Telex Australasia Cochlear Pty Ltd Amalgamated Wireless Australasia

# **CONTENTS**

### SYNTHESIS I

Rolf Carlson, Bjoern Granstrom, Sheri Hunnicutt Rulsys - the Swedish multilingual text-to-speech approach	2
Clive D Summerfield, Marwan A. Jabri A formant speech synthesiser ASIC: Functional design	8
Manwan A. Jabri, Kiang Ooi Tan, Clive D. Summerfield A formant speech synthesiser ASIC: Implementation	14
PERCEPTION I	
Robert H. Mannell Perceptual space of male and female Australian English vowels	22
U Thein-Tun The gender and individual variations in processing linguistic-phonetic cues	28
CODING I	
M.J. Flaherty On the representation of time-varying LPC parameters by cubic splines with variable knots	36
H. Gondokusumo, T.S. Ng Subband coding of speech using M-band parallel quadrature mirror filters	42
A.W. Johnson, A.B. Bradley The effect spectral modifications have upon the performance of frequency domain coders	48
S.N. Koh, P. Sivaprakasapillai Analysis and synthesis method for packet speech enhancement	54
A. Perkis, B. Ribbum, T. Ramstad Improving subjective quality in waveform coders by the use of postfiltering	60
ANALYSIS I	
Phil Rose Normalisation of tonal F0 from long term F0 distributions	68
J.S. Chang, Y.C. Tong Development of a switched capacitor speech spectrum analyzer: system design	74
Michael G. Barlow, Michael Wagner Prosody as a basis for determining speaker characteristics	80

Kim E.A. Silverman Utterance-internal prosodic boundaries	86
Lori F. Lamel Spectrogram readers' identification of stop consonants	92
RECOGNITION I	
D. Rainton, S.J. Young Consonant recognition using the covariance of the pseudo Wigner distribution	100
J.R. Sholicar, F. Fallside A prosodically and lexically constrained approach to continuous speech recognition	106
P. Pierucci, A. Paladin Multistage vector quantization with acoustic constraints for speaker verification	112
PRODUCTION	
Peter D. Neilson, Megan D. Neilson, Nicholas J. O'Dwyer Redundant degrees of freedom in speech control: a problem or a virtue?	120
David Slater Intrinsic effects of voiced and voiceless unaspirated prevocalic stops on fundamental frequency in Luang Prabang Lao	126
Andrew Butcher Invariance and variability in tongue contact patterns: electropalatographic evidence	132
Jinshi Juang An ARMA model of speech production process with applications	138
ANALYSIS II	
Frantz Clermont A dual exponential model for formant trajectories of diphthongs	146
C. D. Summerfield Pole-zero analysis for the detection of nasality	152
Robert H. Mannell Spectral distortion and spectral distance measures	158
A. Al-Otaibi, Y. El-Imam Automatic segmentation of speech signals into Arabic syllables	164
Xi Xiao, D. Nandagopal, D.A.H. Johnson On the application of AR model in segmenting isolated-word speech signals	170
ASSESSMENT, INTELLIGIBILITY & COGNITION	
V.J. Demczuk An investigation into the intelligibility of various synthetic speech devices	178

W.A. Ainsworth, A.P. Lobo, G.R. West Correlation of speech intelligibility and glottal pulse parameters	184
Katerina K. Karadjova Cognitive networks in the semantic memory of normal and mentally retarded children	190
RECOGNITION II	
M.D. Alder Automatic extraction of syntax applied to speech recognition	198
R. Bennett, E. Lai, Y. Attikiouzel A connected speech parse for Australian English utilizing matrix syllable formation	204
T. Svendsen, K.K. Paliwal, E. Harborg, P.O. Husoey Experiments with a sub-word based speech recognizer	210
Frantz Ciermont, Simon J. Butler Prosodically guided methods for nearest neighbour classification of syllables	216
Simon J. Butler, Frantz Clermont On the asymptotic performance of nearest neighbour pattern classifiers in speech recognition	222
TOOLS	
H.S.J. Purvis The control of a speech synthesiser by an IBM PC	230
Ara Samoueliam, Clive D. Summerfield Computational model of the peripheral auditory system for speech recognition: initial results	234
R.A. Wills, Y.C. Tong An ILS compatible wide band spectrum analysis/plotting program (WBS)	240
Arthur Lagos, Michael Wagner An integrated audio signal interface for use in the teaching laboratory	244
H.S.J. Purvis A general purpose speech editor, the SPEAK language	248
APPLICATIONS	
C. Wheddon Human-computer speech communication systems	256
R. W. King, A.J. Hunt A synthetic speech terminal for Viatel: design, implementation and performance	262
P.J. Kennedy, J.E. Clark Operational language in the cockpit/flightdeck communication environment of Australian civil aviation aircraft	268
P.J. Kennedy, J.E. Clark  Ambient noise in the cockpit/flightdeck communication environment of Australian civil aviation aircraft	274

### SYNTHESIS II

J.E. Clark, R.H. Mannell Some comparative characteristics of uniform and auditorily scaled channel synthesis	282
Simon J. Butler A speech synthesis system based on articulatory modelling	288
Danielle Ribot, Frederic Le Diberder, Pierre Martin The Multivoc text-to-speech system	294
ANALYSIS III	
J. Ingram Connected speech processes and connected speech synthesis	302
Jeffery Pittam, J. Bruce Millar The long-term spectrum of voice	308
J. Bruce Millar Stability of long term acoustic features	314
J. Pittam, C. Gallois, V.J. Callan The long-term acoustic characteristics of emotion	320
Hiroaki Oasa, J. Bruce Millar Acoustic processing of phonetically controlled vowels	326
DISORDERS	
Geoff Plant Speech test procedures for use with hearing impaired Aboriginal children	334
Megan D. Neilson, Peter D. Neilson Sensory-motor integration capacity of stutterers and nonstutterers	338
Corinne Adams Prosody and airflow in deaf speech and visual feedback remediation	344
J. Ingram, B. Murdoch, H. Chenery Prosody in hypokinetic and ataxic dysarthria	350
TECHNICAL AIDS	
Rolf Carlson, Bjoern Granstrom, Sheri Hunnicutt Applications of speech technology in aids for the disabled	358
P.J. Blamey, G.M. Clark Perception of synthetic vowels and stop consonants by cochlear implant users	364
H.H. Lim, Y.C. Tong, G.M. Clark Identification of synthetic vowel nuclei by cochlear implant patients	370

### PERCEPTION II

W.K. Lai, Y.C. Tong, G.M. Clark Absolute identification by cochlear implant patients of synthetic vowels constructed from acoustic formant information	378
Geoff Plant Speech understanding with low frequency hearing: a case study	384
P.J. Blamey, G.M. Clark Combining tactile, auditory and visual information for speech perception	390
CODING II	
Leisa Condie Word recognition using error-correction codes	398
R.E.E. Robinson A simple pitch detector using a digital signal processor	402
Bernt Ribbum, Andrew Perkis, K.K. Paliwal Enhancing the codebook for improving the speech quality of CELP coders	408
S. Sridharan, E. Dawson, J.O'Sullivan Speech encryption using fast Fourier transform techniques	414
ANALYSIS IV	
R. Potapova The length and variability in connected speech for Russian	422
V.V. Potapov The rhythmic organisation of speech in Czech and Russian	426
